Smoother & Younger Looking Skin at the Dental Office!

Great news! In addition to enhancing your smile, we are now also offering facial-skin-rejuvenation treatments with the TwinLight® Rejuvenation method. The TwinLight® laser technology precisely targets imperfections in the skin, leaving the surrounding healthy skin untouched to help speed up the rejuvenation process. The heat from the laser energy also stimulates the production of new collagen in the skin – a true anti-aging breakthrough!
